Amendments to the Claims:

Please amend the claims as follows:

1. (Currently Amended) A method for a merchant to provide an electronic return shipping label to a customer to allow said customer to return goods, comprising the steps of:
receiving a return request for said goods from said customer;
obtaining shipping information related to said return request; ~~and~~
transmitting said shipping information to a carrier server, said carrier server configured to process said shipping information and generating said electronic return shipping label based at least in part on said shipping information;
receiving said electronic return shipping label from said carrier server; and
electronically providing said customer with said return shipping label that can be printed and affixed to a package for returning said goods.
2. (Currently Amended) The method of Claim 1, wherein receiving a return request for said goods from said customer comprises receiving said return request ~~said customer submitting said return request~~ through a merchant website associated with a merchant server.
3. (Original) The method of Claim 1, wherein receiving a return request for said goods from said customer comprises said customer contacting a representative of said merchant and said representative submitting said return request through a merchant website associated with a merchant server.
4. (Original) The method of Claim 1, wherein said shipping information related to said return request comprises a customer address and information related to the size and weight of said goods that are being returned.

12. (Currently Amended) A method for a merchant to provide an electronic return shipping label to a customer to allow said customer to return goods, comprising the steps of:
receiving a return request for said goods from said customer;
obtaining shipping information related to said return request;
transmitting said shipping information to ~~an application-service-provider~~ a carrier server, said ~~application-service-provider-carrier server~~ configured to process said shipping information and generate said return shipping label; and
generating said return shipping label at said ~~application-service-provider~~ carrier server, wherein said carrier server is further configured to provide said customer electronic access to said return shipping label; ~~and~~
~~providing said customer electronic access to said return shipping label.~~

13. (Original) The method of Claim 12, receiving a return request for said goods from said customer comprises said customer submitting said return request through a merchant website associated with a merchant server.

14. (Original) The method of Claim 12, wherein receiving a return request for said goods from said customer comprises said customer contacting a representative of said merchant and said representative submitting said return request through a merchant website associated with a merchant server.

15. (Original) The method of Claim 12, wherein at least a portion of said shipping information related to said return request is obtained from a customer order database.

16. (Original) The method of Claim 12, wherein at least a portion of said shipping information related to said return request is obtained from a product database.

17. (Original) The method of Claim 12, wherein said electronic return shipping label is formatted as an HTML document.
